

Release Plan (3)

High level goals:

- 1) Ability to upload transcript via HTML doc
- 2) Ability to view data in graph and table format
- 3) User profile
- 4) Import and upload files

User Stories for release:

Sprint1:

- (3) As a user, I want to be able to access a website so that I can use the service.
- (2) As a user, I want to be able to create an account so that I can have a personalized profile.
- (6) As a user, I want to be able to upload a HTML file so that I can upload my transcript.

Sprint2:

- (12) As a user, I want the data from my transcript to be parsed so that I can graph results.
- (7) As a user, I want to see a variety of graphs so that I can track my progress and the progress of the organization as a whole.

Sprint3:

- (6) As a user, I want to be able to upload files so that I can save my old work.
- (6) As a user, I want to be able to delete files so that I can upload new ones and keep my personal repository clean.
- (8) As a user, I want a password recovery system so that I can reset my password if forgotten

Sprint4:

- (4) As a user, I want to be able to view classes I've taken so that I can review old information.
- (6) As a user, I want to be able to see files that I have uploaded so that I can review old work.
- (4) As a user, I want to be able to delete files so that I can keep my personal repository clean.

Product backlog:

As a user, I want to be able to view the classes that the members of my organization have taken so that I can ask them for advice
